1. NATURE OF BUSINESS

The Company was originally incorporated under the laws of Ontario in 1917 and on 14 September 1998 was continued under Section 187 of the Canada Business Corporations Act. Its principal business activity is the production of copper, silver and zinc and the exploration and development of natural resource properties.

2. SIGNIFICANT ACCOUNTING POLICIES

Principles of consolidation

These financial statements include the accounts of: Aurcana Corporation and its wholly-owned subsidiaries, Aurcana de Mexico S.A. de C.V. and Minera Aurcana S.A. de C.V., both Mexican corporations. The Company's 80% interest in the joint venture, Real de Maconi S.A. de C.V., a Mexican corporation (Maconi) are accounted for by the proportionate consolidation method. Under this method, the Company includes in its accounts its proportionate share of the assets, liabilities, revenues and expenses. The joint venture has a 100% interest in Minera La Negra S.A. de C.V., a Mexican Corporation (La Negra). All significant inter-company balances and transactions have been eliminated.

These interim financial statements have been prepared by the Company in accordance with Canadian generally accepted accounting principles ("GAAP") based on accounting policies and practices consistent with those used in the preparation of the annual audited consolidated financial statements. The interim consolidated financial statements do not include all information and note disclosure required by Canadian GAAP for annual financial statements, and therefore should be read in conjunction with the Company's audited consolidated financial statements for the year ended 31 December 2007.

Inventory

Mine stores and finished concentrates are valued at the lower of average cost and net realizable value. Cost of finished concentrates inventory includes direct mining and production costs, direct mine overhead costs, amortization and depletion. Cost of sales includes costs of finished concentrates plus shipping costs less amortization and depletion, which is disclosed separately in the statement of income.

Amortization, Depletion and Impairment

Mining machinery, plant and property are depleted on a unit of production basis, based on estimated recoverable reserves. Estimated recoverable reserves include proven and probable reserves and the portion of mineralized zones expected to be classified as reserves.

The carrying values of producing mineral properties and property, plant and equipment, are reviewed when events or changes in circumstances arise that may result in impairments in the carrying value of those assets. An impairment loss would be recognized when the carrying amount of a long-lived asset is not recoverable based on a comparison to the undiscounted future net cash flows. The impairment loss is based on the present value of expected future net cash flow. Estimated future net cash flows are calculated for each property using: estimated recoverable reserves; estimated future metal price realization (considering historical and current prices, price trends and related factors); and, estimated operating, capital and other cash flow. Estimates of future cash flow are subject to risks and uncertainties. It is possible that changes could occur which may affect the recoverability of the carrying value of mineral properties.

Plant and equipment is amortized on a straight-line basis over their estimated useful lives. Amortization begins when Property plant and equipment are put into use. In accordance with EIC 152 - "Mining Assets - Impairment and Business Combinations" the Company includes value beyond proven and probable reserves in its estimate of future cash flow when testing for impairment and determining fair value.

2. SIGNIFICANT ACCOUNTING POLICIES – *continued*

Mineral properties

The Company capitalizes all costs related to investments in mineral property interests on a property-by-property basis. Such costs include mineral property acquisition costs and exploration and development expenditures, net of any recoveries. Costs are deferred until such time as the mineral property is abandoned or sold, or mineralization has been determined and the mineral property interests are either developed or the Company's mineral rights are allowed to lapse.

All deferred mineral property expenditures are reviewed, at least annually, on a property-by-property basis, to consider whether there are any conditions that may indicate impairment. When the carrying value of a property exceeds its net recoverable amount that may be estimated by quantifiable evidence of an economic geological resource or reserve, or the Company's assessment of its inability to sell the property for an amount exceeding the deferred costs, provision is made for the impairment in value.

The amounts shown for acquisition costs and deferred exploration expenditures represent costs incurred to date and do not necessarily reflect present or future values. These costs will be depleted over the useful lives of the properties upon commencement of commercial production or written-off, if the properties are abandoned, sold or the claims are allowed to lapse.

From time-to-time, the Company may acquire or dispose of a mineral property interest pursuant to the terms of an option agreement. As the options are exercisable entirely at the discretion of the optionee, the amounts payable or receivable are not recorded. Option payments are recorded as property costs or recoveries when the payments are made or received. When the amount of recoveries exceeds the total amount of capitalized costs of the property, the amount in excess of costs is credited to income.

3. FINANCIAL INSTRUMENTS

Fair value - The carrying values of cash, accounts receivable, accounts payable and accrued liabilities, approximate their fair values because of the short-term maturity of these financial instruments.

The carrying value of notes payable approximates their fair value as this financial instrument bears interest at an approximate market rate of interest.

Credit risk - The Company's financial assets that are exposed to credit risk consist primarily of cash and accounts receivable. This risk is minimized to the extent that cash is placed with major financial institutions and accounts receivable consist of amounts due from Government Agencies.

Currency risk - The Company is exposed to foreign currency fluctuations to the extent expenditures incurred by the Company are not denominated in Canadian dollars. As at 30 June, the Company had investments in mineral properties that require the Company to make payments in US dollars and Mexican pesos, and US dollar and Mexican pesos work commitments. The Company's ability to make these payments to satisfy its obligations for work commitments will be affected by foreign currency rate fluctuations. The Company does not utilize derivatives or other techniques to manage foreign currency risk.

6. ACQUISITION

In March 2006, the Company entered into a joint venture agreement with Reyna Mining & Engineering S.A. de C.V. (“Reyna”) to operate Maconi through which they are jointly developing the La Negra mine in Queretaro State, Mexico as held in the 100% subsidiary La Negra

As its 20% contribution to the joint venture Reyna contributed all the legal rights and obligations it held to acquire a 100% interest in La Negra, valued in the JV Agreement at US $1,500,000.

The Company acquired its 80% interest in the Joint Venture by making the following contributions to the Joint Venture:

Upon subscription by the Company	$	2,000,000	Paid
Within 10 days of the first anniversary of the Company’s subscription	$	1,000,000	(i)
Within 5 days of the JV 100% acquisition of La Negra	$	1,500,000	Paid
Within 60 working days of the 100% acquisition of La Negra	$	1,500,000	Paid
	$	6,000,000	

(i) contributed by common shares in the Company fair valued at $1,170,361

6. ACQUISITION *continued*

Under the terms of the JV Agreement, the Company has agreed to make the following payments or commitments to Reyna as consideration for signing the JV Agreement:

		Cash		Shares of the Company	
Upon signing	$	25,000	(paid)		
Within 30 days of the date of acquisition of La Negra		-		1,000,000	(issued)

	$	1,250,000		3,000,000	

The capital stock obligations were measured at the fair value of the Company's common shares on the agreement date ($600,000).

The Company also issued to Reyna 1,000,000 warrants, each warrant entitling Reyna to purchase one common share for $0.25 on or before 18 May 2008 (note 11f). The warrants were fair valued at $293,099 using the Black Scholes option pricing model. A finder's fee of US $170,000 was paid in cash.

During May 2006, Maconi entered a formal purchase agreement with Penoles S.A. de C.V. ("Penoles") whereby the Joint Venture acquired 100% of Minera La Negra for US $3,000,000 (the "purchase price") the agreement was subsequently amended and paid as follows:

		Cash	Shares
Upon execution of the purchase agreement	$	2,000,000	-
Within 12 months of execution of the purchase agreement (i)		-	1,114,631

(i) Under the initial terms of the agreement the requirement was for $1,000,000. This was settled under the amended terms for a fair value issuance of shares (fair value $1,170,361).

The Company's 80% proportionate interest on acquisition of La Negra is as follows:

La Negra Mine, Queretaro State, Mexico

The Company holds an 80% interest in the La Negra Property (note 6). On 01 July 2007, the Company entered into commercial production.

Rosario Property, Mexico

On 22 February 2007, the Company received Exchange approval to enter into an Option Agreement to acquire, through its subsidiary, Aurcana de Mexico, a 100% interest in a silver-zinc-lead-gold Property, Rosario ("Rosario") located in Sinaloa State, Mexico for $US 3,000,000.

Under the terms of the Option Agreement, the Company had the exclusive option to purchase the Rosario Property. Following its technical and legal review of the Rosario Property, the Company on 7 August 2007 exercised the Option to Purchase and executed a Sale and Purchase Agreement to acquire a 100% undivided interest in Rosario, under the following terms

On or before 22 February 2007	US$	250,000	(paid)
On or before 7 August 2007	US$	250,000	(paid)

9. UNEARNED REVENUE

In June 2008, Aurcana Corporation agreed to sell to Silver Wheaton (Caymans) Ltd. ("Silver Wheaton") 50% of the silver metal to be produced from ore extracted during the mine-life at La Negra. The sale was made in consideration of a prepayment to Cane Silver Inc., a 100% owned subsidiary of Aurcana, of US$25 million in cash, plus a fee per ounce of payable silver to be delivered to Silver Wheaton of the lesser of US$3.90 (subject to an inflationary adjustment beginning after year three) and the prevailing market price per ounce.

The following table reconciles movements on deferred revenue associated with the Silver Wheaton transaction:

	2008	2007
Unearned revenue - beginning of period	**-**	-
Additions	**25,400,894**	-
Revenue recognized	**(69,702)**	-
Unearned revenue- end of period	**25,331,192**	-

During the period ended 30 June 2008, Aurcana delivered concentrate containing 18,834 ounces (2007 – Nil) of silver for credit to Silver Wheaton

10. ASSET RETIREMENT OBLIGATION

During the year ended December 31, 2007 the Company revised its estimate of asset retirement obligations, associated with the La Negra Mine.

Management has estimated reclamation and closure costs for the current mine workings using its best judgment of such future costs and based on an anticipated mine life of five years. The ultimate value of the asset retirement obligation is uncertain and may change in future years based on updated estimates of costs, mine life, and other new information. Any future changes in the estimate of the asset retirement obligation will be recognized prospectively in the year such adjustment is made.

The Company has estimated the fair value of the asset retirement obligation at 31 December 2007 to be $1,039,200. The obligation has been calculated using a discount rate of 5% and an inflation rate of 2.50%.

Details for the periods ended 30 June are as follows:

	2008		2007
Total asset retirement obligation – beginning of period	921,238	$	-
Total accretion during the period	23,032	$	-

The options granted during the period were granted in accordance with the terms of the Company's 10% Rolling Stock Option Plan approved 11 August 2006, which can be exercised for periods of between two to five years.

As at 30 June 2008, 5,525,000 of the outstanding options have vested, leaving a balance of 125,000 remaining to vest.

For the period ended 30 June 2008, the Company applied the fair value method in accounting for all awards of stock options by using the Black-Scholes option pricing model. The Black-Scholes Option Pricing Model was created for use in estimating the fair value of freely tradable fully transferable options. The Company's stock options have characteristics significantly different from those of traded options and, because changes in the highly subjective input assumptions can materially affect the calculated values, management believes that the accepted Black-Scholes model does not necessarily provide a reliable measure of the fair value of the Company's stock option awards.
